

## Specail Events

ONEIDNET Events, Elite Marketing, Sponsorship

In the ONEIDNET System and in the OneNetwork Module, only in the OneNetwork Module, there are Special Events, which are held in physical locations; however, they are also broadcasted through the OneNetwork Module. Special Events can be classified as two types, one type being the ONEIDNET Special Events held specifically for ONEIDNET's purposes and about ONEIDNET activities, the other type is Eleite Marketing for those Entities, Companies or Organizations that may request to hold their Special Events to be held at a physical location and be hosted and broadcasted through OneNetwork. Additionally, separate Entities, Companies or Organizations may wish to sponsor Special Events, in which case the Entity, Company or Organization is acknowledged in the OneNetwork broadcast about the Specail Event and also visual aids about the sponsor can be installed at the physical location of the Special Event.

One of the most significant Special Events is the ONEIDNET Annual Conventions. This convention is sure to spark significant interest around the world. Nuturally, every user and everyone who attends the Annual Conventions will be interested to know what is next for ONEIDNET. Additionally, ONEIDNET holds other significant events regularly, in particular when ONEIDNET makes announcements of different types regarding multiple subjects that impactful to the world.

In the ONEIDNET OneNetwork Module, other Entities, Companies or Organizations who desire to broadcast and hold anyone of their events through our paltform and venues requires to register in Corporate Office as an Entity, Company or Organization and then proceed to OneNetwork to register in order to request for ONEIDNET to broadcast and/or hold their event(s). The process for these user activities through the OneNetwork Module require communication and planning between the Entity, Company or Organization's authorized representative and a ONEIDNET authorized representative. These types of events are executed wthi separate agreements due to their significance. In the System these events are labled as Elite Marketing.

Separe Entities, Companies or Organizations which are registered in ONEIDNET through the Corporate Office Module and wish to sponsor any desired event can submit a request of sponshorship. These request are then processed by one of ONEIDNET's authorized

representatives. Separate agreements are executed for sponsorship status through the OneNetwork Module between an Entity, Company or Organization's authorized representative and a ONEIDNET authorized representative.

To submit a request to broadcast and hold a OneNetwork Special Event, simply go to the OneNetwork Module and select the menu item for Special Events, when the Special Events area comes up, fill in the required information in the provided form and submit the form to ONEIDNET. A ONEIDNET representative will respond to your request.

To submit a request to Sponsor an event, simply go to the OneNetwork Module and select the menu item for Sponsors, when a Special Event is scheduled to be held in ONEIDNET through OneNetwork, the Entity, Company or Organization can submit their sponsorship requests by completing the sponsorship form and submit it to ONEIDNET. A ONEIDNET representative will respond to your request.

To receive specific support regarding any issue the user may be facing in the system, simply go to the Customer Support link in OneNetwork located on the second header and select this option, the option redirects the user to the Customer Support area. Alternatively, go to the top right hand corner of the user's Control Panel and select the link for Customer Support and it will redirect the user to the Customer Support area where the user can select the issue area, department, module and details regarding the user's concerns. Once the form is completed, it can be submitted. A ONEIDNET representative will respond to your request. Remember that the user may also contact Customer Support directly through vCom via video, voice call or text communication.
