Service Packages
Precise & Numerous Parameters for Services Selection

Each Module in the ONEIDNET Internet Operating System offers General Marketing & Advertising; however, each System Module offers its unique and distictive Module Specific Services.

Users must first register in the ONEIDNET Corporate Office Module as an Entity, Company or Organization Authorized Representative. An Entity may be a single consultant. Once the user is registered in Corporate Office, the user may proceed to the OneNetwork Module to register under the desired System Module for services to commence his/her Module Services activities for the selected Module.

When a user commences Module Services activities, the user is issued an Idendity Badge, which shows that he/she is an Authorized Representative for an Entity, Company or Organization.

To register for Module Services, the user opens the Specific Module and selects the Register Link from the Top Header in the Module. This link takes the user directly to the specific Module registration page in the OneNetwork Module. Once the user is redeirected to the OneNetwork Module, the user chooses the specific Module Service he/she is looking for.

Once the selection process is completed, the user is redirected to his/her Paybook profile to choose the method of payment. Upon approval of payment, the user is ready to begin his/her Module Servicces activities in the Module of their selection. In order for the user to activate Module Services in any of the System Modules, the user selects the Register option for that particular Module for which he/she desires to have services.

Levels of Communication and Planning may be required for Module Service Packages between the Entity, Company or Organization authorized representative and a ONEIDNET authorized representative.

When a User, Company or Organization registers with their respective name in ONEIDNET through the OneNetwork Module, the User, Company or Organization can then effectuate Module Services for their specific entity. Users are reminded that for every

Service provided through any of the ONEIDNET System Modules a separate and Service-Specific agreement is effectuated between the User, Entity, Company or Organization's authorized representative and ONEIDNET as the service provider.

Users must clearly understand that for ONEIDNET Services in the OneShop Module, the user is responsible for the actual sales of the user's products, merchandise or services. This means that the user is responsible for any government regulations, taxes, fees, licenses or permits that may be required to sell their products through their stores in OneShop. Payments made for products, merchandise, or services in OneShop are routed through the Paybook Gateway in ONEIDNET, then ONEIDNET redirects the payment amount entitled to the Store Owner in OneShop according to the user's Paybook account(s) information.

Users must clearly understand that for ONEIDNET Services in the Corporate Office Module, the user is responsible for the actual transactions of the Entity, Company or Organization's products or services between the user and their clients. This means that the user is responsible for any government regulations, taxes, fees, licenses or permits that may be required to provide their products through their offices in Corporate Office. Payments made for products or services in Corporate Office are routed through the Paybook Gateway in ONEIDNET, then ONEIDNET redirects the payment amount entitled to the Entity, Company or Organization Owner in Corporate Office according to the user's Paybook account(s) information.

Users must clearly understand that for ONEIDNET Services in the Travel Time Module, the Travel Time participating Travel Agency is responsible for actual transactions between the Travel Agency and the user for any type of travel arrangements and bookings in the Travel Time Module. Payments made for travel arrangements and bookings in Travel Time are routed through the Paybook Gateway in ONEIDNET, then ONEIDNET redirects the payment amount entitled to the participating Travel Agency in Corporate OfficeTravel Time according to the user's Paybook account(s) information.
